If "Fail," ErrorCode and ErrorMessage fields provide corresponding information.
<i>SubtitleFee</i>	eBay fee to add a subtitle to item listing.

Global Trade Item Number report

Use this section to learn about the fields contained in the Global Trade Item Number report.

Creating a Global Trade Item Number report

Global Trade Item Numbers are integral to worldwide e-commerce because Internet search engines use Global Trade Item Numbers to find products. Examples of Global Trade Item Numbers include Universal Product Codes (UPC), International Standard Book Numbers (ISBN), European Article Numbers (EAN), and so on. For more information about these product identifiers, see [Using product identifiers](#) on page 24.

Note: The Global Trade Item Number report now includes variations information.

When you associate Global Trade Item Numbers with your listings, you ensure that your listings are identified in searches performed by potential buyers. Run this report to view - in one place - all the Global Trade Item Numbers associated with your listings. For example:

ItemID	Product:UPC	Product:ISBN	Product:EAN	Product:MPN	Product:EPID
327095898004	885909459858			MC920LL/A	EPID30971438
280724702242	885909457625		0885909464845	MC774LL/A	EPID14309738
400752507118	753759077600			010-00718-20	
250924892746	452426640795			4460B003	EPID09731438

To create a Global Trade Item Number report:

1. Using a web browser, go to the [Create a Download Request](#) page.
2. Under *Listing and Records*, select **Active**.
3. Verify your eBay account email address.
4. Under *Download Format*, select **File Exchange** and then select **Add Unique Identifiers (UPC/EAN/ISBN/Brand/MPN)**.
5. Under *Date Range*, select either **All Active Listings** or **Active Listings Closing** and then use the date fields to define the desired date range you want to view.
6. Click **Save**. Make a note of the reference number displayed on the Create a Download Request: Success page, which identifies the report you just requested.
7. In the File Exchange navigation bar, click **Completed Downloads**. Your request is displayed on this page. Until it is complete, the request is designated as "in progress."
8. To view the report when it is complete, click the respective **Download** link.
9. When prompted, open the file. Be sure to save the file on your computer.
10. When using Microsoft Excel, you may need to widen the ItemID column to view the entire value. To do so, move the cursor to the ItemID column, click the right-mouse button and select Format Cells. In the Format Cells window under Category, select **Number**. Set Decimal Places to 0 (zero) and, finally, click **OK**.

Revising Active listings to include product identifiers using the GTIN report

Perform the previous procedure first to get a file that contains all of your active listings, then you can add product identifiers for each product. After formatting the ItemID so the complete number displays, follow these steps.

1. For each product, enter a product identifier in the appropriate field. Each product only needs one identifier. For more information about product identifiers, refer to [Product code fields](#) on page 24.
2. After the product identifiers have been entered, remove the Country and Currency information from the Action field metadata. For example, change
`*Action(SiteID=US|Country=US|Currency=USD|Version=745)` to
`*Action(SiteID=US|Version=745)`.

Important: Make sure the SiteID value is for the eBay site where your listings appear.

3. When you are done, upload this file to update your active listings with the required product identifiers.
