Introduction

This section describes this document's purpose and explains where to find the File Exchange listing templates.

How to use this guide

This guide explains how to use the eBay File Exchange listing tool to post product listings to the eBay web site. This guide was designed to be used with one of the standard templates available on the File Exchange [Select Template](#) web page.

How to interpret text styles

The text in this document use these text styles in sentences to imply specific meanings:

- **Bold** signifies objects clicked to perform a function, such as menu commands, buttons, and keyboard keys. **Bold** is also used to highlight a term or phrase before its explanation.
- *Italic* denotes names of pertinent objects, such as application windows, field names, hyperlinks, and introductory terms.
- `Monospace` signifies programming objects, such as code examples, field values, and URLs.
- PlainCapitalLetters signifies a general reference, such as these underlined terms: "For Action, use the VerifyAdd value," and "ReturnsAcceptedOption supports the ReturnsAccepted and ReturnsNotAccepted values."

What is File Exchange?

This section provides a general overview of File Exchange, and then explains the template structure and how to use it.

- [eBay File Exchange overview](#) on page 6
- [Understanding template structure](#) on page 8

eBay File Exchange overview

This section explains the requirements for, and the features of, the File Exchange templates, and then presents a general workflow.

File Exchange benefits and requirements

File Exchange allows you to create a large number of listings offline and then easily bulk upload and manage those listings and the resulting sales reports.

File Exchange is the ideal tool if you:

- Are already familiar with the eBay listing process
- Have a lot of inventory items you want to list on eBay
- Use software, such as Microsoft® Excel, Access or another program to manage your inventory and want to use it to create a listing file for eBay
- Are familiar with flat files and want to batch list several items in a single file.

The File Exchange tool helps you quickly and efficiently:

- Create new listings
- Confirm there are no errors in your listing files before you post them
- Revise active listings
- End active listings
- Download sales reports
- Issue refunds
- Mark items as shipped
- Leave feedback.

File Exchange is a free subscription service, but does have certain computer system requirements.

Requirements for using File Exchange

File Exchange is a cross-platform tool, meaning it can be used on Windows, Mac, or Linux systems, as long as the system has:

- An Internet connection
- A recent version of a standard Web browser such as Firefox, Safari, or Internet Explorer
- A text-editing software application that supports the comma-separated value (CSV) format.

You must also have an eBay account and be subscribed to File Exchange.

To subscribe to File Exchange:

1. Sign in to eBay, and go to the [File Exchange home page](#)
2. Click **Sign Up Now**
3. Read the Terms of Use agreement, and then click **I Agree To These Terms**

You are now ready to use File Exchange.

File Exchange features

The benefits of File Exchange include faster file processing, better response files, the ability to view processing status, and more consistency in naming conventions.

Using the eBay File Exchange features, templates and processes, you can upload and manage a large number of listings, and the resulting sales, using a standard flat-file format.

A flat file is an electronic data file used to exchange information between two systems. Data for each record is separated by a comma, semicolon, or tab. With File Exchange, you can use flat files to list in any eBay category. Flat-file benefits include:

- **Platform independence:** Create and use flat files on any operating system
- **Software independence:** Manage your inventory with almost any spreadsheet or database application
- **Improved efficiency:** Batch list or update several listings simultaneously.

You can also upload and download files using scripts. If you prefer to automate uploads via an HTTP Post, or automate downloads via an HTTP Get, please refer to the [File Exchange Advanced Instructions](#).

Downloadable templates

Each default template file that you download will contain data organized into fields (also called *columns* or *headers*) that your computer system and File Exchange can recognize and interpret.

Using the File Exchange template, you can create one file that contains multiple actions; that is, you can add one listing, revise another listing, end a third, and so forth. eBay has designed several default templates that you can download. Refer to [Using the default templates](#) on page 10.

Sales Management

File Exchange also helps you to download and manage your item sales data at every stage of the listing process. For example, you can download an order report to obtain your most recent sales, or you can download a refunded order report to verify refunds.

File Exchange workflow

To create a product, you perform these steps, which are described in this guide:

1. Select a product creation template to download from the eBay File Exchange Center.
2. Download the template(s) you selected to a known location on your computer.
3. Open the template using a spreadsheet or similar application.
4. Fill in the template to create a new listing file.
5. Save your new listing file in the CSV (comma-separated values) or tab-delimited file format.
6. Upload the new listing file to eBay.
7. Review the upload status and results, and then troubleshoot errors, if needed.

For in-depth information about the File Exchange templates, refer to the [File Exchange Advanced Instructions](#).

Understanding template structure

This section explains the field requirements and file format structure.

Product information can be manually entered into the appropriate template item by item or, if you already have your product information documented in a database or spreadsheet file, you can map your data directly into the template file. Whichever method you select, enter the data in the structure specified, paying particular attention to the following:

- **Required Field:** You must provide data for each of the required fields specified in the tables. Each required field name is preceded by an asterisk *.

Note: New sellers with less than 20 listings can offer only PaisaPay as a payment method. After completing 20 listings, sellers can offer other payment methods like cheques and demand draft. However, PaisaPay will remain a mandatory payment method on all listings.

- **Character type, character limit, and values:** The data must meet the requirements for the character types and limits provided in the template data field tables.
- **Header field names are not case-sensitive:** It does not matter whether you capitalize the letters in the field names or not. For example, File Exchange will recognize both `paypalaccepted` and `PayPalAccepted` as the same field. However, we recommend that you use the header (field) names as they are provided in this manual.
- **Field Relationships:** Some fields are coupled with correlated fields. For example, if you enter a value in the `ShippingService-1:Option` field for a specific item, then you must also enter a value in the `ShippingService-1:Cost` field. In some instances, a field may be optional, technically speaking, but it requires also using a related field because of their relationship. Improperly used fields can cause inconsistent shipping and payment error messages in the results file.
- **Using multiple values in one field:** Some fields support having multiple values. Multiple values must be separated by the pipe (|) character.
- **Template variations across eBay sites:** Not all default templates are supported on each eBay site. For example, the Catalog template is not supported on certain sites.

Tip: For more information about site-specific support, refer to the [File Exchange Advanced Instructions](#).

- **Smart Headers automatically apply values:** If you create an item listing file for specific types of items, such as books, all have the same value, you can enter the value in the header once instead of entering the value for each listing multiple times.

The Action data field header includes metadata information like SiteID, Country, Currency, and other data that are specific to the site from which the template is downloaded. These values should not be changed unless you are an advanced user who would like to list items on a different eBay site and have the necessary permissions from [Customer Support](#).

Choosing a template file

This section explains the designed purpose for each of the listing templates.

Before you download templates, determine where to store the files for easy access and retrieval. Good file management practices help alleviate losing data and time-consuming rework. Each type of template was designed for an intended purpose.

For example, the listing templates have these prescribed uses:

- Use the Item Specifics template to list items based on a particular eBay category, like a particular type of memorabilia
- Use the Catalogue template to list items with ISBN, UPC, or SKU established product identifiers
- Use the Basic template for all other types of listings, such as items that do not have major similarities
- Use the Tickets template for listing tickets in the Events Category, such as concerts and sporting events.

When you first create a listing template, keep the item listings to a minimum, and use the *VerifyAdd* action the first time you upload a file. Uploading a simple file first will help you more easily resolve any errors. After successfully uploading a file, create a file with actual listings, and then upload that file to post real items on eBay.

When you create a new listing file, keep in mind that you can later use it to create similar listing files.

Using the default templates

This section explains how to download a template file, and then enter product information in the template fields.

Acquire a default template

This section explains how to acquire the default templates via the internet.

Downloadable templates enable you to easily create your product and listing template files with a standardized file structure. The column headings in the template files control how the data is uploaded, so standardized files help minimize processing errors. Column header text should not deviate from the standard formats used in the templates.

You must be connected to the Internet in order to download File Exchange templates. For in-depth information about the File Exchange templates, refer to the [File Exchange Advanced Instructions](#).

You can download the templates in two different formats: Excel or CSV. Excel-formatted templates provide field descriptions inside the file, but the CSV templates do not. Choosing the right template will help make listing your items easier. Each template was designed for a specific purpose.

Note: If a pop-up blocker is enabled on your computer, disable this function, or choose to override the blocker when prompted, in order to download the templates.

To acquire a default template:

1. Sign in to your eBay account with your user ID and password.
2. Navigate to the [File Exchange Center](#) page.
3. Click **Select Template** on the left side of the page. The *Select Template* page opens.

Select a Template: File Exchange

Select the template that you would like to use to upload your listings and updates. [Learn more.](#)

Item Specifics Category template
Use this template to list in one category. This option allows you to enter item specifics to your listings.

Figure 1: Select Template page

Tip: After navigating to the *Select Template* page, you can use the links on the left side of the page to access all of the other File Exchange pages used in these procedures.

4. Select one of the template files in either CSV or Excel format, and then follow the prompts to save the template on your computer.

Enter data in the template fields

This section explains how to use a File Exchange template file to create a product listing file.

The default templates can be modified using any software program that reads comma-separated value (CSV) format, such as a spreadsheet program or a text editor. We recommend using a spreadsheet program, which structures the information in a table layout.

Each row in the table represents an individual item. The columns, or *field names*, define the types of product characteristics, like Brand and Model. The individual cells in each row define the *field values*, like Apple and Motorola. These two components form the name-values pairs that define specific characteristics about a product, like Brand = Apple. Field names that have an asterisk must have values; field names without an asterisk are optional.

The procedure below provides sample entries for the a default template. The action used in a template file determines which of the default fields are required to contain values (data). For example, using the Revise and Relist actions only require using the ItemID field; whereas using End requires the

ItemID and Endcode fields. For more information about Action field requirements, refer to the [File Exchange Advanced Instructions](#).

For more information about general field requirements, refer to [Required template fields](#) on page 25.

1. Use the descriptions below to enter data for the required (*) fields:

Header Field Name	Purpose	Accepted Values	Example
*Action	<i>VerifyAdd</i> allows you to test a simple file before uploading your actual listings. To upload actual listings, use the <i>Add</i> action.	No other values are accepted.	VerifyAdd
*Category	Specifies the eBay product category. Copy the category number from one of the rows with Info in the Action field. After doing this, you may delete the Info rows. Your Category field must be a valid eBay Category, such as <i>18978</i> .	Valid eBay category ID	18976
*Title	Specifies which terms are found when buyers search for products. Use multiple terms so it's easy for buyers to search for this product.	Open; user-defined 55 characters (including blank spaces)	Lexmark 8300 Printer Organic Body Lotion
*Description	Specifies product details and general information. To use multiple line descriptions, enter HTML text here, and use the and <P> tags to separate the lines.	Open; user-defined 500,000 characters (including blank spaces)	5 -in-1 Printer, Fax, Scanner, Copier, and Card Reader
PicURL	Link to a hosted photo of the item. Photo must be self-hosted, meaning the URL entered points to your photo on a web server accessible on the internet. Separate multiple image URLs with a " " (pipe character).	Open; user-defined 2048 characters (including blank spaces)	http://xxx /pic2.jpg
*Quantity	Specifies the number of this type of item for sale. Commas between integers are not required for large numbers.	Open; user-defined	10
*Format	Specifies the type of listing format, such as Auction or FixedPrice.	Auction (default), FixedPrice, ClassifiedAd, RealEstateAd	FixedPrice

Header Field Name	Purpose	Accepted Values	Example
*StartPrice	Specifies the cost of the product. Decimal points and commas must be correctly placed. No currency symbol is required.	Open; user-defined 16 characters (including commas and decimal point)	10.00
*Duration	Specifies how long the listing will be posted on eBay. Choose 1, 3, 5, 7, or 10 for all formats except StoresFixedPrice. Use 30 or Good 'Til Cancelled for StoresFixedPrice listings.	Only certain values are allowed, and the choice of values depends on the listing format. Valid Auction and Fixed Price durations include: 1, 3, 5, 7, and 10 (days). If you are a qualified seller, you can also use (30) days, and GTC (for the Good Til Cancelled) for FixedPrice.	10
*Location	Indicates to the buyer the location from where the item will be shipped. Postal zip codes are supported, or include city, state (two-letter abbreviation), and country (three-letter abbreviation).	Open; user-defined 45 characters (including blank spaces)	95124
PayPalAccepted	This is a boolean value, meaning 1=true, or "yes." The PayPalEmailAddress field must also be used.	Open; user-defined	1
PayPalEmailAddress	Ensures you receive correspondence from PayPal. This must be the same email address as on your PayPal account.	Open; user-defined	myEmail@PayPal.com
*ShippingType	Determines whether you use a standard (flat) or calculated rate for shipping. Only <i>Flat</i> or <i>Calculated</i> are valid entries. If <i>Calculated</i> is used, no entry for <i>ShippingService-1:Cost</i> is needed.	Open; user-defined	Flat
ShippingService-1:Option	Identifies the shipping service carrier. For valid shipping service entries, refer to Optional template fields on page 28. Must accompany an <i>ShippingService-1:Cost</i> entry.	Open; user-defined	UPSGround
ShippingService-1:Cost	Defines the shipping cost. Must accompany an <i>ShippingService-1:Option</i> entry.	Open; user-defined 16 characters (including commas and decimal point)	5.00

Header Field Name	Purpose	Accepted Values	Example
*DispatchTimeMax	Defines the handling time required to package the item.	1, 2, 3, 4, 5, 10, 15, 20, 30	2
*ReturnsAcceptedOption	Tells buyers whether or not they can return the item.	ReturnsAccepted, ReturnsNotAccepted	ReturnsAccepted

Note: Field values are sometimes required for only certain categories. For example, the *Service Provider* field value is required for phones, but not video games. The *Platform* field value is required for video games, but not phones. The upload response file denotes whether required values are missing.

- When you are finished entering values in the fields, save this file in CSV format to a known location on your computer.

Adding a new field to a default template

This section explains how to add new fields to a default File Exchange template.

The default File Exchange templates only contain a subset of all the supported fields; fields need to be added for most of the optional fields, as well as for new features. This section explains how to add a new field in one of the default templates, or in one of your working product listing files.

The File Exchange templates contain both required and optional fields. Do not change or delete any of the required field headers. Required fields are in **bold type** or have an asterisk (*) beside the field name.

An optional field can be deleted, or renamed to serve as a new field that is not in the default templates. For example, you may not want to use the *Subtitle* field, but would like to offer free shipping for this item, you can replace it with `ShippingService-1:FreeShipping`, and use it for that purpose.

Another option for adding new fields is to add blank columns in the template, and then add the new field names in the column header.

You do not have to remove unused fields, but doing so after creating and successfully uploading a new listing file makes it easier to customize and manage different types of product listing files.

Field names must follow the format requirements explained in [Template field definitions](#) on page 25. These instructions describe using Microsoft Excel; if you are using a different spreadsheet application, use similar functions in that application to complete this procedure.

- Open a default template or one of your working product listing files.
 - The default templates are available on the File Exchange [Select Template](#) page.
- Add the following new header field names using one of these methods:
 - Click on a field in the first row (except for Action) and select **Insert > Column** on the menu bar. Enter a field name in the new column, such as `Border`, and then press **Enter**.
 - Click on an optional field in the first row that you do not intend to use, such as *Highlight*. Enter a new field name in its place, such as `Border`, and then press **Enter**.

3. Enter values (in the second row, below the field header) for the new fields, and then save the file.

Deleting a field from a default template

This section explains how to remove fields from a default File Exchange template.

The File Exchange templates contain both required and optional fields. Unused optional fields can be deleted to streamline your template files. Do not change or delete any of the required field headers. Required fields are in **bold type** or have an asterisk (*) beside the field name.

Tip: Instead of deleting an unused optional field, it can be renamed to serve as a new field that is not in the default templates. For example, you may not want to use the *BoldTitle* field, but would like to offer free shipping for this item, you can replace it with `ShippingService-1:FreeShipping`, and use it for that purpose.

To delete an unused optional field, select the column and select **Edit > Delete**.

Using revision files

This section explains how to simplify the revision process by downloading and then updating listing files.

To simplify the revision process, you can download files that contain existing listing information, which you can then update with only minimal changes before uploading those changes to eBay File Exchange. File Exchange allows up to 1000 uploaded listings per day. To upload as many as 10,000 listings per day, contact Customer Support.

On the *Create a Download Request* page, you can download these types of revision files:

- **Revise price and quantity:** Use to update the *SiteID*, *Currency*, *StartPrice*, *BuyItNowPrice*, and *Quantity* fields in Active listings.
- **Revise payment status:** Use to update the *PaymentStatus* field in Sold listings.
- **Revise shipping status:** Use to update the *ShippingStatus*, *ShippingCarrierUsed*, and *ShipmentTrackingNumber* fields in Sold listings.
- **Product Identifiers:** Use to update the *UPC/EAN/ISBN/Brand/MPN* field in Active listings.

In addition to the fields you use to update your listings, the revision files provide the *Action* and *ItemID* fields and values. These field values need not be changed.

You perform the same steps to download the Active Listings and Sold Listings revision files; the type of revision file you use determines which fields are contained in the downloaded file.

To download a revision file:

1. Using a web browser, click [here](#) to display the **Create a Download Request** page.
2. Select **Active Listings** or **Sold Listings** from the *Listing and Records* drop-down menu.
3. Select **File Exchange** for the Download format, and then select the desired type of revision file from the drop-down menu (such as Revise Price and Quantity or Add Unique Identifiers (UPC/EAN/ISBN/Brand/MPN)).
4. Under **Date Range**, select All Records to download all Active or Sold listings, or use another option to refine the range of dates you want to include.

5. Verify your eBay account email address.
6. Click **Save**. Be sure to make a note of the download request reference number on the *Create a Download Request: Success* page. This number identifies the revision file you just requested.
7. In the navigation bar, click **Completed Downloads**. The *View Completed Downloads* page provides a link to download the revision files. After your request has been processed, you'll see the reference number on this page. Click the adjacent **Download** link.
8. When prompted, open the file. When the file is opened in a spreadsheet application, save it on your computer.
9. If you are using Microsoft Excel, to display the ItemID listing numbers select the ItemID column, click the right-mouse button, and then select **Format Cells**. In the Format Cells window under *Category*, select **Number**, set *Decimal Places* to 0, and then click **OK**.
10. To revise field values, update the fields you want to change, such as Title or Quantity. When you are finished, save the file in CSV form and then close the file.
11. Using a web browser, click [here](#) to display the **Upload Listings & Updates** page and then click the **Browse** button next to *File Location* to select the file you saved in step 10 above.
12. Click **Upload**.

To verify that your changes were uploaded, click **View Upload Results** in the navigation bar.

Using the ConditionID field

This section explains how to add a value for the new *ConditionID* field in one of the default templates, or in one of your working product listing files.

The *ConditionID* field replaces the existing fields, *A:Condition* and *C:Condition*. These two condition fields will work until July 27, 2010, when eBay will require item conditions to be specified in the new field. We recommend that you change all existing condition fields in your listings to the *ConditionID* field format as soon as possible.

Condition values are now defined by *ConditionID* numbers. A *ConditionID* value, like 1000, has different meanings, depending on the category used. For example, 1000 means *New* in a computer category listing, but means *New with box* in a shoes category listing.

Because *ConditionID* values vary depending on the category, you should refer to the [item condition look-up](#) page to see if the category you are using requires a new condition value, and to see what the Condition definitions are for each category. To get the new *ConditionID* values for all categories, click the **ConditionIDs by Category** link on the [File Exchange Instructions and Resources](#) page.

To get the *ConditionID* values for a particular category, go the File Exchange Select Template page and generate an Item Specifics template. The generated template contains the new *ConditionID* field, and the *ConditionID* numbers and literal values are defined in the Item Specifics Definitions file that accompanies the generated template.

To get the available ConditionID values for a given category, follow these steps:

1. Go to the [Select Template](#) page, and under *Item Specifics Category template*, click **Select a category**.
2. On the *Select Template: Item Specifics* page, select the category that best describes your item. Keep selecting more definitive categories to the right until no more options appear.

Tip: If you already know the category number, enter it in the *Category#* field.

3. Click **Generate Template**.
4. On the *Generate Template* page, click the **Item Specifics Category Template** link to open the file.
5. Click the **Item Specifics Definitions** link to open the file.
6. In the *Item Specifics Definitions* file, select the appropriate *ConditionID* number for your item, and copy it to the *ConditionID* field in the Item Specific Category template file.

Note: If you want to update the item condition description in one of your existing listing templates, you will need to change the existing condition column name (A:Condition or C:Condition) to ConditionID, and then enter the numeric value below it.

7. Enter any other required or desired field values for the item in the appropriate fields (like payment and return policy information), and then save the file in comma-separated value (CSV) format.

Uploading and downloading files

This section explains how to upload a template file and then download inventory and sales reports.

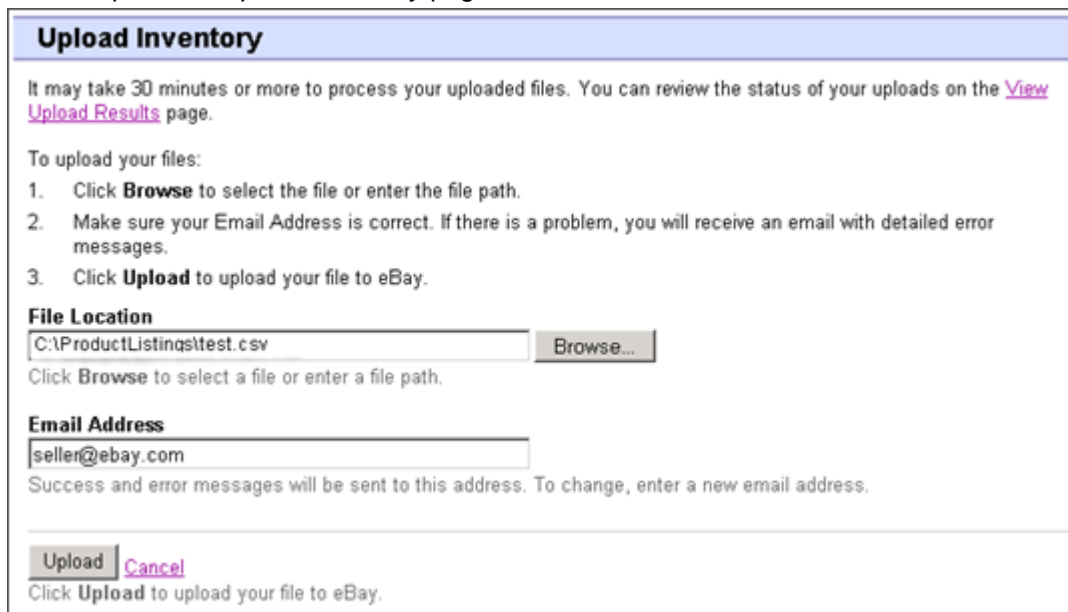

Upload a template file

To upload listing files to File Exchange, you must be connected to the internet. You'll also need a valid email address in order to receive upload confirmations.

Template files are validated when uploaded as follows:

- A basic format check is performed when files are uploaded. For example, if you use a format other than .csv, or tab-delimited .txt in some regions, the upload will fail. Also, if the Action field is not present in the first column, or the required fields are not present and properly formatted, the upload will fail.
- If you create your File Exchange CSV files on a Unix system (such as Linux), you must convert the files from Unix format to DOS format before you upload them to eBay. To do so, run the unix2dos utility against the files to properly encode line breaks. For example, run `unix2dos linuxfilename.csv`. Doing so converts the Unix instruction for a new line (\n) to an instruction recognized by Windows (\r\n). Be sure to upload the converted Windows-compatible version of the files.
- You can only upload 1,000 actions every 24 hours. If you have exceeded your upload limits for the day, the upload will fail. If the number of actions in the file exceeds the eBay limit, the upload will fail. To request an increase in your upload limit, contact [Customer Support](#).

An example of an *Upload Inventory* page is shown below.

Upload Inventory

It may take 30 minutes or more to process your uploaded files. You can review the status of your uploads on the [View Upload Results](#) page.

To upload your files:

1. Click **Browse** to select the file or enter the file path.
2. Make sure your Email Address is correct. If there is a problem, you will receive an email with detailed error messages.
3. Click **Upload** to upload your file to eBay.

File Location

Click **Browse** to select a file or enter a file path.

Email Address

Success and error messages will be sent to this address. To change, enter a new email address.

[Cancel](#)
Click **Upload** to upload your file to eBay.

Figure 2: Upload Inventory page

After uploading files, always check the upload results report to verify that no errors occurred. eBay sends you an email confirmation noting its success or failure. (If the upload fails, the email you receive will describe any errors.)

Later, you will receive another email notifying you that the product listings were posted successfully.

Follow these steps to upload your template file:

1. Go to the [File Exchange Center](#) page, select **Upload Listings and Updates**, which opens the *Upload New Listings and Updates* page.
2. Under File Location, click **Browse** to find the new product creation template .csv file you previously created. When you have found and selected the file, click **Open** to place it in the *File Location* field.
3. Type in the email address where you want File Exchange to send emails to (it defaults to your account email).
4. Click **Upload** to send your template file to eBay.

View upload results

Click **View Upload Results** on the *Upload Inventory* page to view the summary and status of the file(s) you've just uploaded.

The *View Upload Results* page shows the status of uploaded files, along with this information:

- Date you uploaded the file
- Reference number generated by eBay File Exchange
- Number of requested actions in the file
- Percentage of actions completed
- Links to the uploaded file(s)
- Upload status, which includes: File Received-In Queue, In Progress, Completed, Failed - Invalid File Format
- Links to the Load Results report, as described in [Load results report details](#) on page 20.

The *View Upload Results* page also allows you to download any file that has been previously uploaded. For example, if you want to create a similar file from one that uploaded successfully, simply download that file and rename it when you save it. You can also download your upload results report from this page once processing has completed.

Use the *View Last* drop-down menu to see your upload results sorted by time frames (24 hrs, last 7 days, 30 days or 90 days).

An example of a *View Upload Results* page is shown below.

View Upload Results						
File Receipt History						
						View last: <input type="text" value="7 days"/> <input type="button" value="Go"/>
Upload Date	Ref #	# of requested actions	% of completed actions	Uploaded File*	Status	Load Results Report**
Feb-17-11 12:28:42 PST	51181	500	100%	Download (Compressed)	Completed	Download (Compressed)
Feb-11-11 14:32:57 PST	50904	500	100%	Download (Compressed)	Completed	Download (Compressed)
Feb-11-11 09:54:29 PST	50902	1000	100%	Download (Compressed)	Completed	Download (Compressed)
Feb-11-11 09:41:48 PST	50901	750	100%	Download (Compressed)	Completed	Download (Compressed)

* eBay will retain uploaded files and upload results files for 90 days.

** The Load-Results report provides information regarding successful and unsuccessful uploads. Use the [Error Codes Reference](#) table to correct unsuccessful uploads.

Figure 3: View Upload Results page

Click on a **Download** link under *Load Results Report* to open a results file.

Load results report details

The Load Results report contains processing data about each listing in your upload file. An example file is shown below.

FileExchange_Response_173732.csv

Figure 4: Load Results report

The column headers (or data fields) are described in [Result and report fields](#) on page 39.

Generating reports

This section explains how to download inventory and sales reports generated by completing a download request, and then explains how to create download schedules.

Create a download request

Now it's time to learn how to create inventory and sales history reports based on the inventory and listing files you just created. Click **Create a Download Request** on the *File Exchange Center Overview* page (or **Download Files** in the left navigation bar) to open the *Create a Download Request* page shown below.

Create a Download Request

Select active listings and sales history records that you want to download.
Note: Your sales records are available for the current month and the past three calendar months.

Listings and records

Date Range
 All records
 All new records since last download only (Last downloaded: Jul-01-08 00:00:00 PDT)
 From

From at
 To at

Email address

 Your downloads will be sent to this email address. Separate multiple email addresses with commas.

[Cancel](#)

Note: Downloads may take a day past your scheduled time to become available.

Figure 5: Download request form

The *Create a Download Request* page enables you to generate inventory and sales reports by choosing one of these filters on the *Listing and Records* menu:

- Active items
- Sold items
- Unsold items
- Sold and archived items
- Items awaiting payment
- Items paid and awaiting shipment
- Items paid and shipped
- Archived items
- All Sold and Archived

You can also use date ranges to control which data gets captured in a generated reports. All of the above reports can be generated using the example procedures in [Download a Sold items report](#) on page 22 and [Download an Active listings report](#) on page 22.

Download an Active listings report

This section explains how to generate a report that shows all of your active listings.

There are several types of status-oriented reports, all of which can be downloaded using this procedure. In this example, you will generate an inventory snapshot report following these steps:

1. Select **Active Listings** from the *Listing and Records* drop-down menu.
2. Type in the email address(es) you want the file sent to (it defaults to your registered email).
3. Click **Save**.
4. In the navigation bar, click **Completed Downloads**. The *View Completed Downloads* page provides links to download the report(s) you just created.

The Active listings report, in .csv format, provides you a view of all your listings still selling on eBay. (After a listing ends, it moves to the Sold or Unsold listings.) This file is in default list order by end date, and with all Good Til Cancel Items listed at the end.

You can import this file into your inventory system and use the data in it to reconcile and manage your inventory. An example file is shown below.

	B	C	D	E	F	G	H	I
1	PrivateID	ProductTypeID	ProductIDValue	QuantityAvailable	Purchases	Bids	Price	StartDate
2	356423			75	22		15.75	Sep-21-08
3	356425			158	42		22.5	Sep-21-08

Figure 6: Active listings report

For Active listings field descriptions, see [Result and report fields](#) on page 39.

Download a Sold items report

This section explains how to generate a report that shows your current sales.

There are several types of sales-oriented reports, all of which can be downloaded using this procedure. In this example, you will generate a Sold items report.

1. Select **Sold** from the *Listing and Records* drop-down menu.
2. Type in the email address(es) you want the file sent to (it defaults to your registered email).
3. Click **Save**.
4. In the navigation bar, click **Completed Downloads**. The *View Completed Downloads* page provides links to download the report(s) you just created.

The report you download provides a summary of the profits generated by each of your sold listings. The data displayed is calculated based on stored product information, eBay fees, and the total revenue generated by the sold listing.

The report contains the following:

- Buyer information
- Payment information
- Shipping information
- Sales information
- Cost information
- Listing information
- Feedback information

Note: For report field definitions, refer to [Sold Listings report fields](#) on page 41.

The figure below is a sample Sold Items report (in .csv format). The generated report and its data fields or column headers will differ depending on the filter you select.

	A	B	C	D	E	F	G	H	I	J
1	Sales Rec	User Id	Buyer Full	Buyer Pho	Buyer Em	Buyer Add	Buyer Add	Buyer City	Buyer Stat	Buyer Zip

Create a download schedule

You can create automated download schedules using the File Exchange Center for various types of inventory reports in order to view your updated sales information on a regular basis.

The *Download Schedule* page enables you to specify which reports will be automatically sent to you by choosing one of these filters on the *Listing and Records* menu:

- Sold items
- Unsold items
- Sold and archived items
- Items awaiting payment
- Items paid and awaiting shipment
- Items paid and awaiting shipment
- Archived items
- All Sold and Archived items

You can also use date ranges to control which data gets captured in a generated reports.

The following is an example of *Create a Download Schedule* page with **Sold** selected.

Create a Download Schedule

You can automate the download process and access your updated sales information on a regular basis.

Listings and records

Frequency

 Select how often you'd like to receive a report. [Learn More](#)

End schedule
 Specify when you'd like us to stop sending your sales information
 End by: at US Time (PST).
 No end date

Email address

 Your downloads will be sent to this email address. Separate multiple email addresses with commas.

[Cancel](#)

Note: Downloads may take a day past your scheduled time to become available.

Figure 8: Create a Download schedule

After selecting the options you want and entering your email address, click **Save**.

View download schedule

To view a summary of your download schedule, and a list of completed downloads, click **Download Schedule** on the left side of *File Exchange Center* page.

This page shows the currently scheduled downloads, and allows you to edit or delete download schedules.

Template field definitions

This section explains the field requirements and purpose by specifying character limits, data types, and field relationships.

Required template fields

This section explains the required fields used to define how a listing appears on eBay, and also what types of information is displayed.

Action

Required field in all templates. Determines the purpose of the row: add item, relist item, revise item, end listing, mark and item's status, verify an added item, and add item description information.

Character limit	N/A
Type	Text string
Valid Entry	Add, Revise, Relist, End, Status, VerifyAdd, or AddToItemDescription
Field Dependency	Must enter all required field data for a particular type of action.

Category

Required field in the basic and item specifics templates only.

Numeric ID of the Category where the item is to be listed. Required for non-catalogue items. To get category IDs, go to the [Category code](#) page.

Character limit	Max length 10
Type	Integer
Valid Entry	Category number, like 178 (for Printers).
Field Dependency	Must use a valid eBay category number.

ConditionID

Describes the appearance and state of the product. Condition IDs are numeric, not textual, and vary according to the respective category. To retrieve the Condition IDs in the Item Specifics Definition file, generate an Item Specific template for a category.

Character limit	N/A
Type	Integer

Valid Entry	<p>Possible valid eBay <i>ConditionID</i> values include: 1000, 1500, 2000, 2500, 3000, 4000, 5000, 6000, and 7000. get</p> <p>To get the <i>ConditionID</i> values for a particular category, go the File Exchange Select Template page and generate an Item Specifics template. The generated template contains the new <i>ConditionID</i> field, and the <i>ConditionID</i> numbers and literal values are defined in the Item Specifics Definitions file that accompanies the generated template.</p> <p>To view the ConditionID values for all categories, click the ConditionIDs by Category link on the File Exchange Instructions and Resources page.</p>
--------------------	--

Description

Product information about the item. Include all relevant item and product specifications that may be of interest to the buyer.

Note: File Exchange does not support line breaks and carriage returns in this field. If multiple line descriptions are desired, you must paste HTML text into this field. Use the
 and <P> HTML tags to separate lines into multiple paragraphs.

eBay provides a script that removes all carriage returns, escape quotes, and performs all necessary changes to make your Description field text valid for File Exchange. To get the script and instructions for using it, refer to the [How to use the new File Exchange Item Description Utility](#) Knowledge Base page.

Character limit	Max length 500,000
Type	Text string
Valid Entry	Sentences that accurately and completely describe the item.
Field Dependency	This field is optional for catalogue listings but required for non-catalogue listings.

*DispatchTimeMax

Specifies the handling time, defined as the maximum number of business days you usually take to prepare an item for shipping to domestic buyers after receiving a cleared payment. **DispatchTimeMax* does not include the time required to ship the item (the carrier's transit time) to the buyer.

Character limit	N/A
Type	Integer
Valid Entry	1, 2, 3, 4, 5, 10, 15, 20, 30
Field Dependency	This field may be specified without specifying Shipping Service Costs. <i>*DispatchTimeMax</i> is a required field for most categories, and only applies to Flat shipping.

Duration

How long would you like your listing to be posted on eBay? Enter the amount of days you'd like the listing to be active.

Character limit	Max length 3
Type	Integer
Valid Entry	<p>Only certain values are allowed, and the choice of values depends on the listing format. Valid Auction and Fixed Price durations include: 1, 3, 5, 7, and 10 (days). If you are a qualified seller, you can also use (30) days, and GTC (for the Good Til Cancelled) for FixedPrice.</p> <p>You can also refer to the Durations Table on the eBay developer site. (You must have an eBay developer account to access these English-language only pages.)</p>

Format

Listing format for the item. For more information, refer to: [Selecting a selling format](#).

Character limit	N/A
Type	Text string
Valid Entry	Auction (default), FixedPrice, ClassifiedAd, RealEstateAd

Location

Location of the item. Use the Postal Code, or City, State, Country.

Character limit	Max length 45
Type	Alphanumeric
Valid Entry	Postal code, or other valid mailing address

Quantity

Quantity of the item available for sale. A quantity of more than one implies all the items are the exact same.

Character limit	Max length 45
Type	Integer
Valid Entry	Standard numbers, like 1, 15, and 100.
Field Dependency	If <i>LotSize</i> is greater than 1, then the <i>Quantity</i> field indicates the number of lots being listed and <i>LotSize</i> indicates the number of items in each lot. You can only use <i>LotSize</i> in lot-enabled categories.

ReturnsAcceptedOption

Indicates whether a buyer can return the item. **This is a required field.**

Character limit	N/A
Type	Text string
Valid Entry	ReturnsAccepted, ReturnsNotAccepted

StartPrice

Price at which bidding starts. If the listing is in fixed price format, this is the price to buy the item.

Character limit	Max length 16, including decimal point or comma
Type	Currency
Valid Entry	Numeric amount, like 5 . 99, 10 . 00, 100 . 00

Title

Primary name that appears in search results for the item. (This field is optional for catalogue listings but required for non-catalogue listings.)

Character limit	Max length 80
Type	Alphanumeric string
Valid Entry	Keywords and item descriptors, like product name and model.

Optional template fields

This section explains the optional fields used to define how a listing appears on eBay, and also what types of information is displayed.

AdditionalDetails

Provides detailed explanation of your return policy.

Character limit	Max 500 characters
Type	Text string
Valid Entry	User input
Field Dependency	The <i>ReturnsAcceptedOption</i> field is required when you use this field.

BoldTitle

Do you want to see your listing in boldface type? This field applies bold face type to the title of your listing. Additional fees apply.

Character limit	N/A
Type	Boolean
Valid Entry	0 or 1 (0=false, 1=true) Default is 0.

Border

Specifies whether the item listing will have a border around it.

Character limit	N/A
Type	Boolean
Valid Entry	0 or 1 (0=false, 1=true) Default is 0.
Field Dependency	Using this field does not affect the item SubTitle, if any.

BuyItNowPrice

Price required to immediately buy an auction-style format item. Defines the price you are willing to accept for the item, which will immediately end the auction. Not valid for fixed priced format items.

Character limit	Max length 16, including decimal point or comma
Type	Currency
Valid Entry	Numeric amount, like 10 . 00, 29 . 99, 100 . 00.

CustomLabel

Your unique identifier for the item, like a stock-keeping unit (SKU) number. The buyer does not see this information.

Character limit	Max length 50
Type	Alphanumeric string
Valid Entry	Text or numeric string.

GalleryDuration

Specifies whether the item is included in the Gallery, either in the general Gallery or in the special "featured" section above it.

Character limit	N/A
------------------------	-----

Type	Text string
Valid Entry	Days_7, Lifetime
Field Dependency	Featured must be entered in the <i>GalleryType</i> field.

GalleryType

Indicates how and where images are displayed. The options are:

- **Gallery:** Image is included in the eBay search results.
- **Plus:** In addition to the benefits of 'Gallery', includes an icon in the eBay search results that, when clicked or moused over, displays a large 400 x 400 pixel preview image of the item. Otherwise, your image is shown at the standard size of 96 pixels.
- **Featured:** In addition to the benefits of 'Plus', your item is at the top of the search results in the Featured section.

For more information, refer [About gallery upgrades](#).

Character limit	N/A
Type	Text string
Valid Entry	None (default), Gallery, Plus , Featured.

Highlight

Do you want your listing highlighted. This option highlights your listing with a colored background. Additional fees apply.

Character limit	N/A
Type	Boolean
Valid Entry	0 or 1 (0=false, 1=true) Default is 0.

PaymentStatus

Do you show buyers when a payment has been received? Specifies whether or not the item has been paid for.

Character limit	N/A
Type	Boolean
Valid Entry	0 or 1 (0=false, 1=true) Default is 0.

PicURL

URL of the image to add to your listing. If a Gallery upgrade is specified (Plus or Featured), the image will be used for the search preview image. For best results, use an image that is in JPEG format and is at least 1000 pixels wide.

A listing can have a maximum of 12 images hosted by EPS or 1 by a third party. Multiple URLs can be separated by the '|' character. Images for a listing can either be hosted by eBay Picture Services (EPS) or by a third party (but not both). To add images to EPS, the UploadSiteHostedPictures API must be used (not directly supported in File Exchange).

Important: If an image URL has blank spaces, you must replace the blank spaces with %20; otherwise, the image will not appear in the listing.

Character limit	Max length 2048
Type	Text string
Valid Entry	http://i.ebayimg.ebay.com/image1.jpg http://i.ebayimg.ebay.com/image2.jpg http://hostedpics.com/images/item1.jpg

RefundOption

Defines how the buyer will be compensated for a returned item.

Character limit	N/A
Type	Text string
Valid Entry	Exchange, MerchandiseCredit, MoneyBack
Field Dependency	The <i>ReturnsAcceptedOption</i> field is required when you use this field.

ReturnsWithinOption

The number of days after an item is received by the buyer within which the buyer must notify the seller of an intention to return the item.

Character limit	N/A
Type	Text string
Valid Entry	Days_3, Days_7, Days_14, Days_30, Days_60. Default is <i>Days_7</i> .
Field Dependency	The <i>ReturnsAcceptedOption</i> field is required when you use this field.

ShippingCostPaidBy

Defines who pays the shipping cost for returning an item.

Character limit	N/A
------------------------	-----

Type	Text string
Valid Entry	Buyer, Seller
Field Dependency	The <i>ReturnsAcceptedOption</i> field is required when you use this field.

ShippingService-1:Cost

Cost to ship the item with the selected shipping service.

Character limit	N/A
Type	Currency
Valid Entry	Numeric amount, like 0 . 00, 1 . 99.
Field Dependency	Field must accompany <i>ShippingService-1:Option</i> regardless of whether <i>ShippingService-1:FreeShipping</i> has a value or not. A value should <u>not</u> be entered if <i>ShippingService-1:FreeShipping=1</i> , or <i>ShippingType=Calculated</i> or <i>Freight</i> for domestic services.

ShippingService-1:Option

A domestic shipping service the buyer can choose to ship the item.

Character limit	N/A
Type	Text string
Valid Entry	Must be a valid service option value. For valid service option values, refer to the <i>Shipping services fields</i> section of the File Exchange Advanced Instructions .
Field Dependency	Must be accompanied by <i>ShippingService-1:Cost</i> .

ShippingService-1:Priority

Defines the display order of the domestic shipping service options shown in your listing.

For example, if two or more domestic shipping services are specified, the service with *Priority* as 1 will be the first shipping option shown in your listing.

Note: Each domestic service priority must be unique; no two domestic shipping services can have the same *Priority*.

Character limit	N/A
Type	Integer
Valid Entry	Numeric value, like 1, 2, or 3.

Field Dependency	Field and a value are required if more than one domestic shipping service is specified.
-------------------------	---

ShippingService-1:ShippingSurcharge

Additional cost for buyers who have the item shipped via UPS to Alaska, Hawaii, Puerto Rico, or Guam.

Character limit	N/A
Type	Currency
Valid Entry	Numeric amount, like 3 . 99.
Field Dependency	A value should <u>not</u> be entered if a surcharge is not desired (0 . 00 is <u>not</u> a valid value).

ShippingService-2:Cost

Cost to ship the item with the selected shipping service.

Character limit	N/A
Type	Currency
Valid Entry	Numeric amount, like 0 . 00, 1 . 99.
Field Dependency	Field must accompany <i>ShippingService-2:Option</i> . A value should <u>not</u> be entered if <i>ShippingType=Calculated</i> or <i>Freight</i> for domestic services.

ShippingService-2:Option

A domestic shipping service the buyer can choose to ship the item.

Character limit	N/A
Type	Text string
Valid Entry	Must be a valid service option value. For valid service option values, refer to the <i>Shipping services fields</i> section of the File Exchange Advanced Instructions .
Field Dependency	Must be accompanied by <i>ShippingService-2:Cost</i> .

ShippingService-2:Priority

Defines the display order of the domestic shipping service options shown in your listing.

For example, if two or more domestic shipping services are specified, the service with *Priority* as 1 will be the first shipping option shown in your listing.

Note: Each domestic service priority must be unique; no two domestic shipping services can have the same *Priority*.

Character limit	N/A
Type	Integer
Valid Entry	Numeric value, like 1, 2, or 3.
Field Dependency	Field and a value are required if more than one domestic shipping service is specified.

ShippingService-2:ShippingSurcharge

Additional cost for buyers who have the item shipped via UPS to Alaska, Hawaii, Puerto Rico, or Guam.

Character limit	N/A
Type	Currency
Valid Entry	Numeric amount, like 3 . 99.
Field Dependency	A value should <u>not</u> be entered if a surcharge is not desired (0 . 00 is <u>not</u> a valid value).

ShippingStatus

Do you want to inform buyers when an item has been shipped? Specifies whether or not the item has been shipped.

Character limit	N/A
Type	Boolean
Valid Entry	0 or 1 (0=not shipped, 1=shipped) Default is 0.

SubTitle

Secondary name that appears in search results for the item (in addition to the title). Note that additional fees apply for using this field.

Character limit	Max length 55
Type	Alphanumeric string
Valid Entry	Keywords and item descriptors

Tip: To remove a subtitle when revising or relisting an item, open a new Excel or CSV file. Enter a column header for *Action* and *ItemID*. Under *Action*, enter *Revise* (or *Relist*), and under *ItemID*, enter the Item ID value for this listing (from the Load Response file). In the third column, enter `DeletedField=Item.SubTitle` in the column header. Save in CSV format, and upload the file.

WarrantyDurationOption

Specifies how long warranties are honored. Available in IN only.

Character limit	N/A
Type	Text string
Valid Entry	Months_1, Months_3, Months_6, Years_1, Years_2, Years_3, Years_MoreThan3. (Default is Months_6)
Field Dependency	The <i>WarrantyOfferedOption</i> field is required when you use this field.

WarrantyOfferedOption

Do you offer warranties in your product listings? Specifies whether or not the product manufacturer offers warranties for the item purchased. Available in IN only.

Character limit	N/A
Type	Text string
Valid Entry	WarrantyOffered, None (Default is None).
Field Dependency	The <i>WarrantyTypeOption</i> and <i>WarrantyDurationOption</i> fields are required when you use this field.

WarrantyTypeOption

Specifies the warranty options. Available in IN only.

Character limit	N/A
Type	Text string
Valid Entry	ReplacementWarranty, DealerWarranty, ManufacturerWarranty (Default is DealerWarranty)
Field Dependency	The <i>WarrantyOfferedOption</i> field is required when you use this field.

Payment and return fields

This section explains the payment, return policy, and other transaction fields you can use to specify how a buyer can pay for and return an item.

AdditionalDetails

Provides detailed explanation of your return policy.

Character limit	Max 500 characters
------------------------	--------------------

Type	Text string
Valid Entry	User input
Field Dependency	The <i>ReturnsAcceptedOption</i> field is required when you use this field.

COD

Do you accept cash on delivery (COD) payments? Specifies whether or not a COD is accepted as payment.

Character limit	N/A
Type	Boolean
Valid Entry	0 or 1 (0=false, 1=true) Default is 0.

MOCashiers

Do you accept money order and cashier's check payments. Specifies whether money orders and cashier's checks are accepted as payment.

Character limit	N/A
Type	Boolean
Valid Entry	0 or 1 (0=false, 1=true) Default is 0.

PaisaPayEscrow

Do you accept PaisaPay as a payment service? Specifies whether or not PaisaPay is accepted as payment.

Character limit	N/A
Type	Boolean
Valid Entry	0 or 1 (0=false, 1=true) Default is 0.

PaisaPayEscrowEMI

Do you accept PaisaPay Equated Monthly Installment (EMI) as an installment plan payment service? Specifies whether or not PaisaPay EMI is accepted as payment.

Character limit	N/A
Type	Boolean
Valid Entry	0 or 1 (0=false, 1=true) Default is 0.

PaymentInstructions

Do you want to provide payment instructions to a buyer? Informs buyer about payment contingencies.

Character limit	Max length 500 characters
Type	Alphanumeric string
Valid Entry	Null (default); use short descriptive sentences.

PaymentSeeDescription

Do you specify payment methods in the *Description* field? Specifies whether or not acceptable payment methods are stated in the *Description* field. If you do not set any other payment method, you must specify *PaymentSeeDescription=1*.

Character limit	N/A
Type	Boolean
Valid Entry	0 or 1 (0=false, 1=true) Default is 0.

PaymentStatus

Do you show buyers when a payment has been received? Specifies whether or not the item has been paid for.

Character limit	N/A
Type	Boolean
Valid Entry	0 or 1 (0=false, 1=true) Default is 0.

PersonalCheck

Do you accept personal check payments? Specifies whether or not a personal check is accepted as payment.

Character limit	N/A
Type	Boolean
Valid Entry	0 or 1 (0=false, 1=true) Default is 0.

RefundOption

Defines how the buyer will be compensated for a returned item.

Character limit	N/A
------------------------	-----

Type	Text string
Valid Entry	Exchange, MerchandiseCredit, MoneyBack
Field Dependency	The <i>ReturnsAcceptedOption</i> field is required when you use this field.

ReturnsAcceptedOption

Indicates whether a buyer can return the item. **This is a required field.**

Character limit	N/A
Type	Text string
Valid Entry	ReturnsAccepted, ReturnsNotAccepted

ReturnsWithinOption

The number of days after an item is received by the buyer within which the buyer must notify the seller of an intention to return the item.

Character limit	N/A
Type	Text string
Valid Entry	Days_3, Days_7, Days_14, Days_30, Days_60. Default is <i>Days_7</i> .
Field Dependency	The <i>ReturnsAcceptedOption</i> field is required when you use this field.

WarrantyDurationOption

Specifies how long warranties are honored. Available in IN only.

Character limit	N/A
Type	Text string
Valid Entry	Months_1, Months_3, Months_6, Years_1, Years_2, Years_3, Years_MoreThan3. (Default is Months_6)
Field Dependency	The <i>WarrantyOfferedOption</i> field is required when you use this field.

WarrantyOfferedOption

Do you offer warranties in your product listings? Specifies whether or not the product manufacturer offers warranties for the item purchased. Available in IN only.

Character limit	N/A
Type	Text string
Valid Entry	WarrantyOffered, None (Default is None).

Field Dependency	The <i>WarrantyTypeOption</i> and <i>WarrantyDurationOption</i> fields are required when you use this field.
-------------------------	--

WarrantyTypeOption

Specifies the warranty options. Available in IN only.

Character limit	N/A
Type	Text string
Valid Entry	ReplacementWarranty, DealerWarranty, ManufacturerWarranty (Default is DealerWarranty)
Field Dependency	The <i>WarrantyOfferedOption</i> field is required when you use this field.

Result and report fields

Explains the field definitions used for upload results and various reports.

Load results report fields

The table below explains the load results field data downloaded from File Exchange.

Load Results Report Fields	
Field Name	Description
<i>Action</i>	Action value for corresponding listing.
<i>ApplicationData</i>	Custom, application-specific data to be associated with the new item.
<i>AuctionLengthFee</i>	eBay fee for 10-day auction for this listing.
<i>BoldFee</i>	eBay fee to boldface the title for the item listing.
