## 1 eBay File Exchange Features, Templates and Processes

File Exchange is eBay's flat-file tool that enables sellers to list on Half, eBay and eBay's international sites by submitting a comma-separated, semicolon-delimited, or tab-delimited flat file. A flat file may be created using excel, MS Access or other inventory software.

The benefits of File Exchange include faster file processing, better response files, the ability to view processing status, and more consistency in naming conventions.
Using the eBay File Exchange features, templates and processes, you can upload and manage a large number of listings, and the resulting sales, with a standard flat-file format. The File Exchange tool helps you quickly and efficiently:

- Create new listings
- Confirm that there are no errors in your listings before posting them
- Revise active listings
- End active listings
- Download sales
eBay File Exchange is an ideal tool if you:
- Have a lot of inventory items you want to list
- Already use software, such as Microsoft $\mathbb{R}$ Excel, Access or another program to manage your inventory and you want to use it to create a listing file too
- Are familiar with flat files and want to batch list several items in a single file

## File Exchange Features

## Flat-file Format

A flat file is an electronic data file used to exchange information between two systems. Data for each record is separated by a comma, semicolon, or tab. With File Exchange, you can use flat files to list in any eBay category.
Flat-file benefits include:

- Platform independence: Create and use flat files on any operating system.
- Software independence: Manage your inventory with almost any spreadsheet or database program.
- Improved efficiency: Batch list or update several listings simultaneously.

## Downloadable Templates

Each file that you use must contain data organized into fields (also called "columns" and "headers") that your system, Half.com and eBay's systems, can recognize and interpret.

Using the File Exchange template, you can create one file that contains multiple actions; that is, you can add one listing, revise another listing, end a third, and so forth.
eBay has created data file templates that you can download, as described in the next sections.

## Sales Management

File Exchange also helps you download and manage your item sales data at every stage of the listing process.

## Becoming a Half.com Seller

In order to use File Exchange to sell on Half.com you must register for File Exchange and become a Half.com seller.

Go to the following page to register for File Exchange:
File Exchange: http://pages.ebay.com/file exchange/
In addition, if you would like to automatically receive download files, you need to subscribe to Selling Manager Pro. Click here to learn about Selling Manager Pro:
http://pages.ebay.com/selling manager pro/

## Changes Made to File Exchange to Support Half.com

Sellers can now use eBay File Exchange to sell on Half.com. To support Half.com, we have made the following changes to File Exchange:

- Uploads
o New Half.com inventory loading template
o New Half.com issue refunds template
- Downloads
o New Half.com orders download file
o New Half.com inventory snapshot file
o New Half.com pending payments download file
o New Half.com completed payments download file
To load inventory on Half.com, you must use the Half.com-specific templates. In addition, to receive Half.com download files, you must select the Half.com options.

## File Exchange Center

Half.com sellers can access the File Exchange templates via the File Exchange Center homepage. Files will be processed through this site using HTTP.
You can also upload files via HTTP Post. If you prefer to automate uploads via an HTTP post, please click on the File Exchange Center's Instructions and Resources link for more information.

The following image of the File Exchange Center on Half.com shows file Upload and Download options for a subscribed user. This page will be accessible within your Half.com My Account page if you are subscribed to File Exchange. It gives you convenient links to access File Exchange pages on eBay. You may also access File Exchange directly through the eBay site.

## Upload Listings and Updates

Upload inventory and refund files directly to Half.com. Click on the Upload Listings and Updates link from the File Exchange Center Page to upload the following files:

- Inventory Files
- Refunds Files

Note: As of November 21, 2005 there is a bug in the system that sends the confirmation email to your registration email address and not to the email address that you select to specify. We are working on fixing this issue.

The following is an example of the Upload New Listings and Updates page.

## View Upload Results

Click on View Upload Results from the File Exchange Center Page to view a summary and status of the files you've uploaded.
You can also download your upload response files from this page once it has completed processing.

## Create a Download Request

You can download the following Half.com file from the Create a Download Request page:

- Half.com Orders

NOTE: You need to be registered to sell on Half.com to see the "Half.com Orders" option in the Listings and records menu of the Create a Download Request page.
The following is an example of the Create a Download Request page.

Home > My eBay > File Exchange > Create a Download Request

## Create a Download Schedule (for Selling Manager Pro subscribers only)

If you subscribe to Selling Manger Pro, you will have the option to create automated download schedules within File Exchange. You can automate the download process and access your updated sales information on a regular basis.

Four scheduling options are available, and depend on the file type selected. The current options are:

- Half.com Orders
o Frequency: Daily, Hourly, Every 4 hours, Every 8 hours
- Half.com Inventory
o Frequency: Daily, Weekly, Monthly
- Half.com Pending Payments
o Frequency: Daily
- Half.com Completed Payments
o Frequency: Twice Monthly; sent on the 6th and 22nd of every month
The following is an example of Create a Download Schedule with Half.com Orders selected.

Home > My eBay > File Exchange > Create a Download Schedule

## File Exchange

Hello, Name (41 浣)

## View a Download Schedule (for Selling Manager Pro subscribers only)

To view a summary of your download schedule, and a list of completed downloads, go to Download Schedule.

## Half.com Upload Files

Click on the Select Template link to find a customized template to upload your inventory listings or issue refunds. Sellers can choose from the following templates to sell on Half.com:

- Half.com Load Inventory: Use this template to load inventory items to Half.com
- Half.com Issue Refunds: Use this template to issue refunds from Half.com

The following Select Template page contains all available templates. Sample templates with sample records are also provided.

## File Exchange

Select Template
Select the template that you would like to use to upload your listings and updates. Learn more.
Item Specifics Category template
Use this template to list in one category. This option allows you to enter item specifics to your listings. Select a category

Catalog listing template
Use this template if you plan to use ISBN or UPC codes to list items in the following categories: Books, Movies, Music, and Video Games. CSV format I Excel format
Basic template (no item specifics)
Use this template if you're listing in categories that do not include item specifics. CSV format I Excel format
Half.com templates
Use these templates to manage inventory and sales on Half.com
Load Inventory: CSV format I Excel forma
Issue Refunds: CSV format I Excel format

## Creating a File Exchange Inventory File

An Action must be associated with all of your Half.com listings.
NOTE: There are different data field requirements for listing on Half.com and eBay. Please refer to the File Exchange User Guide for the data fields that are required in your File Exchange template when listing on eBay.

## Inventory Actions

## Inventory Actions include Add, VerifyAdd, Revise and End.

NOTE: Using "Info" in the Action field denotes that this row is not requesting any action, but rather, is an informational (or comment) row. You can then use the Info row to "comment out" notes about the flat file, without risking any processing errors. This feature can be very useful in tying back a file loaded to your response file.

## Add and Verify Add

For adding or verifining a new item, required fields include:

- Action = Add or VerifyAdd
- ProductIDType (e.g. ISBN, UPC)
- ProductIDValue (ISBN or UPC \# for the product)
- A:Condition (Condition of your item)
- Price

Optional fields include:

- Quantity=1 (For Add: If no value is supplied, item will be listed with quantity=1)
- Notes
- Private Notes
- SKU

## Revise

For revising an existing item, required fields include:

- Action $=$ Revise
- ItemID or SKU (eBay/Half Item ID. This is used as a primary item key for Revise or End Actions; either ItemID or SKU are required.)
Optional fields include (note that these are the only fields that can be modified when you revise an item):
- Condition
- Price
- Quantity
- Notes
- Private Notes

## End

For ending an existing item, required fields include:

- Action = End
- Item ID or SKU (eBay/Half Item ID. This is used as a primary item key for Revise or End Actions; either ItemID or SKU are required.)

The table below lists the Half.com File Exchange actions and corresponding required and optional fields.

| Field Name | Description | Action <br> where <br> Required |
| :--- | :--- | :---: |
| *Action | Determines the purpose of the row: add item, relist <br> item, revise item, end listing, mark an item's status, and <br> verify an added item. <br> Character limit: $\mathrm{n} / \mathrm{a}$ <br> Type: String <br> Valid choices are: Add, VerifyAdd, Revise, End | All |

| *ProductIDType | You must fill in the type of data contained in <br> ProductIDValue (See the following data field.) If you <br> upload an item that has multiple matches for its ISBN <br> or UPC, you must resubmit the item using <br> ProductIDType=ProductIdentifier. Refer to "Handling <br> Multiple Matches in Catalog Listings" in the File <br> Exchange User Guide for more information. <br> Character limit: n/a <br> Type: Text String <br> Valid entry: ISBN, UPC, EAN <br> Field Relationship: Based on ProductIDValue | Add or <br> VerifyAdd |
| :--- | :--- | :---: |
| *ProductIDValue | Value of ProductIDType. This field will be either the <br> ISBN or UPC number for the item you are listing. If <br> you upload an item that has multiple matches for its <br> ISBN or UPC, you must resubmit the item using <br> ProductIDType=ProductIdentifier. Refer to "Handling <br> Multiple Matches in Catalog Listings" in the File <br> Exchange User Guide for more information. | Add or <br> VerifyAdd |
| Character limit: n/a |  |  |
| Type: String |  |  |
| Valid entry: Integer Value for ISBN, UPC, EAN or |  |  |
| String for ProductIdentifier (for example, |  |  |
| $58640: 2: 1055: 2281435410: 39473100: 30 d 76 c 76 f 23 f 6 b f 7$ |  |  |
| 325148c5088c3c46:1:1:1:1195808884) |  |  |
| Field Relationship: Based on ProductIDType |  |  |$\quad$| *ItemID |
| :--- |

| Quantity=1 | Number of items being sold in the listing. For Add, if <br> no item is supplied, then the item will be listed with <br> quantity of 1. <br> Character limit: n/a <br> Type: Integer <br> Valid entry: for example, 200 | None |
| :--- | :--- | :---: |
| Price | Price item is being listed with. Minimum allowable <br> price is \$0.75. <br> Character limit: Max length 16, including decimal point <br> or comma <br> Type: Money <br> Valid entry: for example, 10.00 | Add and <br> VerifyAdd |
| *A:Condition | Condition of item. <br> Character limit: n/a <br> Type: text <br> Valid entry: Brand_New, Like_New, Very_Good, <br> Good, or Acceptable | Add and <br> VerifyAdd |
| A:Notes | Notes for the buyer regarding specifics about your <br> item. <br> Character limit: Max length 500 <br> Type: any | None. |
| PrivateNotes | For your use only. PrivateNotes will be included in <br> your order files. <br> Character limit: Max length 1000 <br> Type: any | None. |

## Inventory Templates and Files

In addition to specifying Actions for your listings, you will use a Load Inventory template to load inventory items to Half.com. There are three files that can help you with your Half.com inventory.

- Load Inventory template
- Load Response file
- Inventory Snapshot (summary of your Active Listings)

## Load Inventory Template

To access the Load Inventory template, go to the File Exchange Center page and click on the Select Template link. The following requirements apply to the Half.com Load Inventory template:

- Only supports Half.com inventory
- Half.com inventory template specifics
o The Half.com Inventory template is made specifically for inventory on Half.com. All columns and column headings should be kept in the template. If the top row of the template is modified, it may result in the file failing on upload.
- Metadata

0 Metadata parameters are global settings for your file. The metadata information for your file is contained in parentheses in the first column in the header row of your file. Each element of metadata tells the system to apply that specific value to all listings in your file. The result is many fewer columns of information that you need to be included in each line.
o The column header with metadata for the inventory load template is as follows (metadata is in bold):

Action (SiteID=US|Country=US|Currency=USD|CC=UTF8|ListingType=Half|Location=US|ListingDuration=GTC)

The descriptions of each of these metadata parameters are as follows:
o SiteID=US

- SiteID=US for Half.com listings
o Country=US
- Represents the country in which you are located
o Currency=USD
- Represents the currency you want to list your item in
o ListingType=Half
o Location=US
- Represents the location of your item
o ListingDuration=GTC
- Represents the duration of your listing. GTC means "Good Till Closing," your item will not end until you choose to end it.
o CC=UTF-8
- Represents the character set of your template

Additional Details regarding Metadata can be found in the File Exchange User Guide.

## Load Response File

Upon loading a file and having it processed, a File Exchange Load Response File will be issued automatically. This report can also be requested through the File Exchange Center homepage.

## Inventory Snapshot

The Inventory Snapshot file includes a complete list of active listings (at the time of the request), and accompanying product and pricing data.
Select Inventory Snapshot from My Account in Half.com. The image below shows a sample Inventory Snapshot request form.

## Inventory Snapshot Success

The following image is an example of what a successful Inventory Snapshot Request should look like. A reference number indicates that your download request was successfully received. In contrast, a Request Failure page, without a reference number, indicates that a download request cannot be processed. Sellers are able to request one inventory snapshot per 24 hour period.

## Half.com Orders

From the File Exchange Center homepage, select Download-> Download Files. From the Create a Download Request page, select Half.com Orders.

Your order file will not contain orders that have been refunded or marked as shipped.
Below is a list of the fields in the order file.

## Table: Order File Fields

| Field | Description | Field Format |
| :--- | :--- | :--- |
| ItemID | This is the same eBay/Half ItemID that you <br> will receive in your inventory response file for <br> each listing. Along with ReferenceID, this <br> number will serve as the unique identifier for <br> each item sold, and will be included in "contact <br> seller" emails. Is required for bulk refunds <br> issued via file. | Number |
| ReferenceID | Combined with ItemID is a unique identifier <br> for an individual item in a purchase. Will be <br> included in "contact seller" emails. Is required <br> for bulk refunds issued via file. | Number |
| OrderID | Represents all items from a particular buyer in <br> the same order. (For single item orders, it will <br> be the same as the ReferenceID.) Also the <br> number you will most likely receive from <br> buyers who contact you directly without using <br> the Half.com site contact form. | Number |
| SKU | Your SKU as provided at time of uploading <br> inventory | Any character - matches <br> what you uploaded |
| ProductIDType | ISBN or UPC | "ISBN" or "UPC" |
| ProductIDValue | Value of ISBN or UPC | ISNB or UPC number <br> format |
| Title | Product Title (including title, contributor, <br> release year, and format) | Title: Contributor (Format, <br> Publish Year) |
| Format | Examples: Hardcover, Paperback, VHS, DVD, <br> etc | Letters |
| PrivateNotes | Your private notes you supplied when |  |
| uploading your inventory |  |  |$\quad$| Any character - matches |
| :--- |
| what you uploaded |$\quad$

| TransactionPrice | Price your item was listed with and sold at. <br> NOTE: this is not the total amount you <br> received for the sale. For detailed information <br> on amount credited to your account for each <br> sale you should reference the Pending or <br> Completed Payments file. | Currency format |
| :--- | :--- | :--- |
| OrderDate | Date and time order was placed. NOTE: Date <br> and time in order files is in GMT. | YYYY-MM- <br> DDTHH:MM:SS.000Z (in <br> GMT) <br> Example: 2005-11- <br> 18T13:47:26.000Z |
| ShippingService | USPSMedia or USPSExpressMail | "USPSMedia" or <br> "USPSExpressMail" |
| ShipToName | Name on buyer shipping address | No character restriction |
| Street1 | First line address on buyer shipping address | No character restriction |
| Street2 | Second line address on buyer shipping address | No character restriction |
| CityName | City of buyer shipping address | Letters |
| StateOrProvince | State of buyer shipping address | Letters - 2 letter state <br> abbreviation |
| Country | Country of buyer shipping address | Letters |
| PostalCode | Postal code of buyer shipping address | Postal code format |
| BuyerEmail | Buyers email address | Email address format |

## Half.com Payments

Payment files will be available only for Half.com sellers who are subscribed to Selling Manager Pro and have access to the scheduling page. The following types of payment files will be available:

## Half.com Pending Payments

The pending payments file will be generated on a daily basis. It will include a total of all sales from the current pay period (either the $1^{\text {st }}-15^{\text {th }}$ of the month or the $16^{\text {th }}-$ end of month). Each day the file should be replaced with an updated version, including the additional sales or charges from the new day. Files should be available by 6PM PST the following day.

The file naming convention is: [email address]halfpending_[pay period start date]to[current date]. ie: half@half.compending 3105 to 3 1105.

## Half.com Completed Payments

Upon a payment period being completed, a "closed" pay period file will be deposited into the seller's completed payments directory. The file will be in the same format as the Pending Payments file.

Example: File for pay period with last day on Tuesday would be available Thursday at 10am PST.

## Table: Payment File Table

| Field | Description | Field Format |
| :--- | :--- | :--- |
| ItemID | This is the same eBay/Half ItemID that you <br> will receive in your inventory response file for <br> each listing. Along with ReferenceID, this <br> number will serve as the unique identifier for <br> each item sold, and will be included in "contact <br> seller" emails. Is required for bulk refunds <br> issued via file. | Number |
| ReferenceID | Combined with ItemID is a unique identifier <br> for an individual item in a purchase. Will be <br> included in "contact seller" emails. Is required <br> for bulk refunds issued via file. | Number |
| OrderID | Represents all items from a particular buyer in <br> the same order. (For single item orders, it will <br> be the same as the ReferenceID.) Also the <br> number you will most likely receive from <br> buyers who contact you directly without using <br> the Half.com site contact form. | Number |
| SKU | Your SKU as provided at time of uploading <br> inventory | Any character - matches <br> what you uploaded |
| ProductIDType | ISBN or UPC | "ISBN" or "UPC" |
| ProductIDValue | Value of ISBN or UPC | ISNB or UPC number <br> format |
| Title | Product Title (including title, contributor, <br> release year, and format) | Title: Contributor <br> (Format, Publish Year) |
| PrivateNotes | Your private notes you supplied when | Any character - matches <br> what you uploaded |
| uploading your inventory |  |  |

| ShippingReimburse <br> ment | Amount of shipping reimbursement credited or <br> debited to your account for the item sold or <br> refunded | Currency format |
| :--- | :--- | :--- |
| Commission | Amount of commission deducted or credited <br> from your sale for the item sold or refunded | Currency format |
| AmountPaid | Total amount credited or deducted to your <br> account for the sale or refund. | Currency format |
| PaidTime | Date and time of sale or refund | YYYY-MM- <br> DDTHH:MM:SS.000Z (in <br> GMT) <br> Example: 2005-11- <br> 18T13:47:26.000Z |

## Half.com Refunds

If you cannot fulfill an order, you'll need to issue the buyer a refund. The Refunds File gives you the ability to issue refunds in bulk.
Table: Refunds File Fields

| Column | Description | Required |
| :--- | :--- | :--- |
| Action | Value should always be <br> "IssueRefund". Should be <br> populated for all lines. | Yes |
| ItemID | eBay/Half item ID supplied in <br> your inventory load response file <br> as well as your order file. | Yes |
| ReferenceID | Provided in your order file. | Yes |
| RefundReason | $1,2,3,4,5,6$ | Yes |
| RefundType | $1,2,3$ | Yes |
| RefundAmount (to buyer) | Required only if RefundType " $3 "$ <br> selected | Only if "type" $=$ partial. <br> Allowed for any refund type <br> and if value is present, it will <br> override system calculated <br> values. |
| RefundMessage | No | Comments passed on to buyer, <br> max 4000 characters | No | No |
| :--- |

The Refund Reason and Type codes are as follows:
Refund Reason Codes:
1 - Cannot ship the product
2 - Item returned, wrong item shipped
3 - Item returned, quality
4 - Item returned, damaged
5 - Buyer remorse
6 - Other Refund Type Codes:
Refund Type Codes:
1 - Full
2 - Full + return shipping (provide reference and examples
3 - Custom/Partial Refund (requires amount to be populated)
NOTE: All reports will be sent to the email address you specify when making a request.
For each refunds file that you send, you will receive a Refund Response File with line by line success or failure notifications.

Table: Refund Response Table

| Column | Description |
| :--- | :--- |
| Line Number | Corresponds to the line number in your upload file |
| Action | Will be populated with "IssueRefund" |
| Status | "Success" or "Failure" |
| ErrorCode | Error codes for refunds: 91, 92, 93 |
| ErrorMessage | Use standard eBay FE error messages <br> New Half.com error messages: <br> 91: Invalid refund amount <br> 92: Invalid refund reason <br> 93: Invalid refund type |
| ItemID | eBay/Half item ID |

## Scheduling Order Reports (for Selling Manager Pro subscribers only)

Scheduling orders will be available only for Half.com sellers who are subscribed to Selling Manager Pro.
Half.com sellers will be able to schedule the frequency with which they receive their order files. No two order files should include a duplication of the same order.
For example, if a seller has chosen to have order files generated every 8 hours, file \#1 might have orders 1-320. File \#2 should start at order 321, and include the rest of the orders for that time period. Scheduling will be done through the File Exchange Center front end.
